Main Features

Content Optimization Tools

Enhances document quality with translation, sentiment analysis, intelligent search, and grammar checks, improving multilingual communication and ensuring report accuracy.

TalkToDoc

A conversational AI for natural language interaction with documents, making it easy to find contract clauses or extract financial figures from reports.

Intalio SmartBot

Automates tasks, enhances workflows, and generates actionable insights by summarizing board meetings, creating business forecasts, and providing real-time responses to document-related queries.

OCR

Converts scanned documents into editable and searchable formats, enabling tasks like digitizing bank archives or making government forms accessible.

Automated Classification & Indexing

Tags, classifies, and organizes documents automatically, helping manage legal case files or categorize vendor invoices effortlessly.

Intelligent Document Processing

Extracts structured data from invoices, resumes, IDs, and passports, simplifying onboarding processes or identifying top candidates from resumes.
